-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Withdrawal of the finality

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okabe (US 6 184 599) in view of the Japanese pat 58-2429. Okabe discloses a flywheel with a recess means formed by a first portion extended away from the end of a crankshaft, a second portion (62) extended perpendicularly to the crankshaft and a third portion (82) extended downwardly toward an engine side. A stator is mounted with the recess. However, Okabe does not show the use of a central portion of the flywheel extended over the end of the crankshaft. The Japanese patent shows that the provision of a central portion of a flywheel extended over the end of a crankshaft (02) is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by the Japanese pat 58-2429 would have been recognized in the pertinent art of Okabe. Therefore, it would have been obvious at the time the invention was made

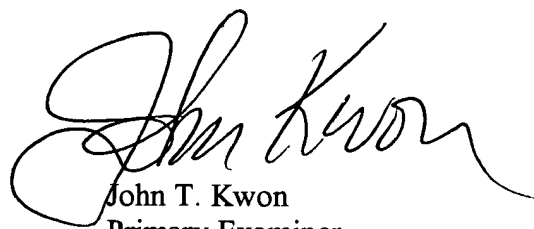

Art Unit: 3747

to a person having ordinary skill in the art to provide the device of Okabe with the central portion of the flywheel extended over the end of the crankshaft as taught by the Japanese pat 58-2429.
